

Anivesh Nishad

Full Stack Developer · 5+ Years · Python · FastAPI · React · AWS · Microservices
anivesh.nishad76@gmail.com · +91 9589957396 · Ujjain, Madhya Pradesh · [LinkedIn](#) · [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 5+ years delivering scalable web applications across fast-paced startups and enterprise service firms. Specialises in high-performance Python backends (FastAPI, Django), modern React frontends, and AWS cloud architecture. Proven ability to architect systems from scratch, lead cross-functional teams, and ship measurable improvements — from 30% API speed gains to 85% computer vision accuracy lifts. Equally effective in product-focused environments and client-delivery service contexts.

TECHNICAL SKILLS

Backend	Python · FastAPI · Django · Flask · Django REST Framework · SQLAlchemy
Frontend	React · Redux · JavaScript (ES6+) · HTML5 · CSS3 · Bootstrap · jQuery · Ajax
AWS / Cloud	Lambda · API Gateway · S3 · SQS · SNS · EC2 · EKS · CloudWatch · Lambda Layers
Databases	PostgreSQL · MySQL · MongoDB · DynamoDB · ElasticSearch · OpenSearch · Redis
Async & Perf	Celery · Redis · Multithreading · Async/Await · Cron Jobs · Serverless
AI / ML	OpenAI / ChatGPT API · OpenCV (cv2) · FFmpeg · Vector Databases
Observability	DataDog · Sentry · SonarQube · AWS CloudWatch · Swagger UI
Testing & QA	Selenium · Postman · Unit Testing · SonarQube Code Coverage
Core Concepts	Microservices · REST API Design · System Architecture · OOP · Auth & Security · CI/CD
Tools	Git · GitHub · Docker · Jira · Asana · PyCharm · VS Code · PgAdmin

PROFESSIONAL EXPERIENCE

Yash Technology

Senior Software Engineer

Dec 2024 – Present

John Deere — Enterprise Case & Solution Search Platform

FastAPI · React · Redux · PostgreSQL · AWS · OpenSearch · DataDog · SonarQube · Microservices

- Designed and built a scalable Case & Solution search engine using FastAPI and OpenSearch, reducing search latency by 35% vs the legacy monolith.
- Led frontend rewrite from class-based to functional React + Redux components, delivering a faster and more maintainable SPA.
- Engineered a reusable authentication package deployed across 10+ independent microservices, standardising security org-wide.
- Configured DataDog APM dashboards for real-time error tracking; enforced SonarQube quality gates on every pull request.
- Collaborated with offshore John Deere engineering leads to align platform architecture with the long-term enterprise roadmap.

YCMS — Yash Competency Management System (Internal SaaS)

FastAPI · React · AWS · PostgreSQL · Redis · Celery · ElasticSearch · Selenium · SQLAlchemy

- Sole architect and full-stack lead for an org-wide SaaS platform managing, tracking, and evaluating employee competencies across all departments.
- Designed the complete system (data models, API contracts, async pipelines, frontend SPA) and owned end-to-end deployment on AWS EKS.

- Built AI-assisted competency gap analysis via LLM integration, enabling automated skill-to-role matching and eliminating hours of manual HR effort per cycle.
- Partnered directly with HR leadership to translate organisational goals into iterative, on-schedule releases powered by Celery + Redis async pipelines.

NeoSOFT Technologies

Oct 2024 – Dec 2024

Software Engineer

Frammer AI — AI-Powered Video Analysis Platform

FastAPI · Flask · PostgreSQL · MySQL · OpenCV (cv2) · FFmpeg · Celery · Redis

- Migrated a production Flask application to FastAPI, leveraging native async handling to achieve a 30% reduction in average API response times.
- Integrated Celery task queuing for long-running video processing jobs, cutting peak-traffic delays by 40% and immediately freeing request threads.
- Overhauled the database query layer — eliminated N+1 loops, applied strategic indexing — resulting in 25% faster queries and 15% lower CPU utilisation.
- Engineered a real-time face detection module using OpenCV and FFmpeg with per-face timestamp tracking, improving video analysis accuracy by 85%.

CubexO Software Solutions

Jul 2021 – Jul 2024

Software Engineer

Investor Pulse — Investment Analytics & Research Platform

FastAPI · PostgreSQL · Redis · Celery · Elasticsearch · Sentry · MongoDB · OpenAI API · Swagger UI

- Architected REST APIs in FastAPI powering real-time investment data pipelines, reducing end-to-end response times by 30%.
- Integrated Elasticsearch with PostgreSQL for full-text and faceted search across large financial datasets, improving complex query performance by 50%.
- Embedded OpenAI ChatGPT API to provide AI-driven investment summaries and research assistance, differentiating the product in a competitive market.
- Sustained 99.8% service uptime through Sentry-based monitoring and automated regression tests, cutting production incidents by 40%.

Betricks — Real-Time Fantasy Sports Platform (betricks.io)

Python · AWS Lambda · API Gateway · Lambda Layers · S3 · SNS · SQS · DynamoDB · Redis · CloudWatch

- Built a fully serverless backend on AWS Lambda + API Gateway for real-time NFL/NBA fantasy contests; implemented Redis caching for live leaderboard hot-paths.
- Automated subscription lifecycle via scheduled Lambda + cron jobs; created asset compression scripts reducing file sizes by 30% and improving mobile load times.

Swim Time Solutions — Appointment & Booking Platform

Django · DRF · PostgreSQL · Redis · Celery · HTML · CSS · JavaScript · jQuery

- Built Django REST APIs and an interactive booking calendar UI; Celery background tasks automated appointment reminders, increasing booking completion rates by 20%.
- Optimised backend processes reducing page load time by 25%; ensured full data integrity across all PostgreSQL CRUD operations.

EDUCATION & CERTIFICATIONS

Bachelor of Technology — Computer Science & Engineering

2017 – 2021

RGPV University, Madhya Pradesh

SQL Basic & Intermediate · HackerRank, 2024

Cloud Computing & Edge AI · upSkill Campus, 2024

Python & Django Development · 2021

Foundation in Java · 2020
